VOLUME XIV.

We are requested to say that it is not true that Buckrer S. Morris and Dr. Bone have signified their belief in the Infailthility of the Pope, and the Immaculate Concepting, and joined the Roman Catholic Church. After this denial, we need not say that the report that these gentiemen, in full canonicals, are to open a Knew Nothing Lodge for the infliation of Irish Catholics, is untrue. They will do no more than get down on their kness when the Bellings.

LATHE FROM WALKER.

We have been pragazing our readers to hear something of Ges. Walker, in connection with another descent upon Central America. The New York Herals of Saturday has letters from Belize, Honduras, saying that the Sprightly, brig, from New Orleans to Rustan, Bay Islands, was overheused by the officers of the pert, and her cargo and munitions seized as contraband. So far so good. Walker will not be dangerons without arms; but if some

him in 1860, was rather discouraging. The net was sprucg; but not a Lincolnite was found therein. Poor old M. rris made such an un-natural chattering, that the few birds that hovered round, uncertain what to do, took fright and flow away. That cackle for Doug-

We suspect from what we see about the of dees of the roads interested, that a scuffic for the business of the Upper Mississippi, between and Chirego, the Illinois Central and the Minnesota Packet Company, on one side, and the Lacrosse and Milwaukra, on the other side, is about to take place. The shamelessness of the bargain wil shem. The shamelessness of the bargein will so far disgnat the more decent men of each faction, that the coalition will prove to be weaker than the Douglas party alone. The leaders have entwitted themselves—nobedy else. Had they been content with the game that is being played in Illinois, they would have done better. A WORD IN TIME. The people in the various counties of the State are about making their nominations of adidates for the Legislature. In so doing,

In so doing, let them remember one thing: Owing to defective or improper legislation, the ray money mills, improperly called banks, have, since their organization in Illinois, enjoyed an immunity which no respectable institutions are entitled to claim. They have paid no apocie. secure many others whose names have been revealed to the appropriate committees.

The people of Tarrant county have appointed a vigilance committee, Hon. I name Farker chairman, with power to examine suspicious strangers, and take such other action as they may deem proper in case of emergency.

A vigilance committee has been appointed at Bellville, Austin county, separate slare, congregations for religious worship were advised to be stopped, pediars to keep ent of the way and special patrol appointed.

The citizens of Cameron met on the 1st inst., repointed a special patrol, warned all abelition favorers away, and organized a vigilance committee. Arms have been found in the negros hance. Prompt to issue their notes and to take any rate of interest, they have manifested a chronic disinclination to redeem their promises to pay. True their notes are secured; (a large part of them by Missour stocks, which are of doubtful value): true they furnish an abundance of currency; but it is equally true that by their manner of doing business under the law, they have managed to keep the price of Eastern exchange up to such a fig-

This is not the purpose far which basks are permitted; and among the objects of local legislation we know of none more important to the whole State than that measure which will compel these shavings hops to recognize the rights of bill holders to have their notes promptrights of bill holders to have their notes promptly redoemed upon demand. For three years—nince the crash in 1857—this delinquency on the part of the banks has been permitted on the part of the banks has been permitted on the part of the people, under the conviction that such a course was nacesary to preserve a circulating medium of any kind whatever. We do not propose to discuss the wisdom of that opinion. But the occasion which gave rise to it has passed. The State is entering upon a career of prosperity. The crops—the ground-work of wealth—are unusually abundant. The markets will unquestionably be remunerative; and it is but fair that in the general improvement of business, the banks which have not falled to reap rich rewards during the hard

The Colorado Otteste cays:

We understand that a negro man was about and killed lest week, by Mr. Alext. Durisary, hving on the Barnard, in this county. The negro was near Mr. Dunisary, armed, and was hanted and told to stop, when he started it run, and white running was abot by Mr. Dunisary. He lived a short time, and stated that there were some dozen atmed segment together in the Barnard bottom, but he said nothing of their plans or intentions. To whem he belonged is unknown, though it is not do helonged to come, gunileans is ticknessen.

The Anderson Terien, of the 11th, mentions the recovery at Houston of two negroes who belonged to two cuttens of Walland's Frains. The negroes had been long absent and were accidentally found by their ownser sneaging their own affairs in Houston. They had require passes, which they said had been given to them by a white man living at Hempsted.

THE CAUK IN MICHIGAN.

[Correspondence of the Press and Tribune.]

Mancumers, Men., Aug. 180, 180.

We were, last evening, favored with the privace of attending a large and enthusiastic Republican meeting at this place. The meeting was addressed by the Hon. M. H. Weir, of La Porte, Indiana. Mr. Weir spoke for about two hours, keeping the entire audience enchained by his eloquence. He is a young map, but his abilities for strong and impressive argument, and powers to exitie, are saldom surpassed. call is really in motion, and we aspect to head up from this county a serjicity of eight hashed for Hames old Abs. Wasserzawa. D. C. Since writing the above, I have been informed that Mr. West has premised to address the Resublicants at Adrian, and Ana Arbor. He will meet with a warm reception.

They cam together on the street, marching to the Semi-nary grounds, there going through a short drill, showing themselves will trained to that part of their duties. At the grounds there had beet a plaiform, previously prepared, decorated with an arch of green begins timmed with flowers, from which was to be presented a beautiful flag from the Republican Indies to the Urbana Wide-Awates. After the march and drill, the com-pany was brought up before the stand, and making as appearance that was admired by all speciators, of whom were some four or file shundred present, and on short notice which on-ly appeared in the Urbon short some yearrday. ruin by which she is now threatened? Disguise it as we may, it is painfully apparent that
Douglas is the cardinate of the Roman Catholic
Hierarchy. Long and earnestly have the seaders
of that apiritual disposition sought the attainment of absolute political power in this country, and wonderfully have they succeeded during
the past eight years. Sevended by the universal
toleration guaranteed by the Constitution, they
have plotted and planned, ever ready to shrisi
"persecution," when their nefarious plans were
discovered and exposed.

Aided by the cunning of Jesuit Inquisitors,
who, for their efforts in behalf of spirunal despotism have been banished from every county
in Europe, where efforts have been made towards ameliorating the condition of the people,
they have falsified history, broken up the public schools, or banished the Bible from them,
and have county stepped into the political arens,
determined here to inaugurate that liberty-adestroying, soul-crushing, apiritual despotism of
the Pope, which for centuries has ground down
the noble spirits of the garden of Europe, till
human nature could endure no more, and they
shave rises, like a moral earthquak, at one- and
forever, to overwhelm and destroy it. Can we,
should we, as Americans, give aid, assistance or
comfort, in any manner, to such an effort? For
my own park, horrible as it may be, I would
prefer the record of a Nero, a Caligula, or even
a Benedict Arnold, to that of any American
who wou'd aid in introducing the political power
of the Pope, and of the Holy (!) Inquisition into
this highly invered and happy land. I cannot
see, therefore, how any one, knowing that Douglas is the candidate of these man and things,
can vote for him, or any manner aid his cause,
directly or indirectly.

buildings are rising in every direction, and everything around belokens anything but decine, or even stringency, in the mosetary affairs of this people. Indeed, when we look to the value of the receipts and the movement of the trade of Chicago, we shall find a satisfactory solution of the great endurance and powers of recuperation of this case endurance and powers of recuperation of this city. According to the report of the Board of Trade of the city, the aggregate value of the exports and imports, of the city for the year 1838-9 amounted to one hundred and eighty militions. It is true that, by the same rule of calculation, adding our receipts from the interior, and aggregating our exports and imports, the trade of New Orleans will nearly quadruple that of Chicago. But, then, these people do not seud off to expend elsewhere the profits of their business. They apply them to property investments and imcan vote for him, or any ma

las is the candidate of these men and things, can vote for him, or any manner aid his cause, directly or indirectly.

As already stated, there is not the slightest chance for the Union party, either before the people or the House, and as this is not as American party, though it possesses many of its prominent festures, why should the American party sustain it, and thus not only loss their votes, but actually austain the efforts of the fragistion in behalf of Mr. Douglis? If they will not thus neutralise their efforts, or do worse, only two candidates are left for us of the continuous property in the policy in t past has had the desire control in the Legisla-tive, Executive and Judicial branchs of the Federal Government, till the last season of Congress, when they had not a majority in the House of Representatives. Judge Douglas is equally responsible for all these evils with Mr. Breckinridge and the Democratic party, and possibly more so, as he renewed the slavery agitation in 1855. If this party is continued in power, what must be our future, judging from the past? Mr. Breckinridge may be a worthy youn gman, but he is inexperienced, hasty, read-and thoughtless, and among the vary last men in the country who should be entrusted with the destinise of the Union in its present crisis, even if he were not committed to the dangerous

bet as the title to the lands are still in the Company and the purchaners pay the interest, they are not disturbed.

Another very remerkable feature of Chicago is the Gymnanum. This people are raving inad on the subject of gymnastic feats and exercises, it is from this passion that that queer military corps, which is attracting so much attention in the Reast, the Zouares, spring. All the young men of this city belong to some gymnasium, is which they spend all sheir spare time, exercising themselves, as efrems actors do, to attain the highest degree of physical power and still. A special exhibition of this sort was gotten up for the benefit of the Southern Exemptionists, which caused our quiet people to open their cyres wide—and the ladies were nearly disposed to abut theirs. The exhibition was given in a specious hall, which was densely crowded with aspectators, including a great number of ladies. The scores consisted of about one hundred and fitty young men, of respectable social and professional positions, who all appeared a is seven people, in hight stockness, with a slight all covering about their loins, commonly called a breech-cloth. The chief was distinguishable from the others by wasting a spangled silkes a breech-cloth. The chief was distinguishable from the others by wasting a spangled silkes a research of the secretary of the sum and the secretary of the secretary of the secretary vision of aerobatic and gymnastic displays, such as somersalits, little heavy weights, reaing, climbing ladders and swinging, and certainly evinced great skills peated so the degree of the usual sort of aerobatic and gymnastic displays, such as somersalits, little heavy weights, reaing, climbing ladders and swinging, and certainly evinced great skills peated to the such exercises the time which, in other communities is given to dissipation. In this view the institution is a good out, and its introduction into New Orleans might be a great blessing to our community and a great relief to our, roung mean, who are so coverly puz the destinise of the Union in its present crisis, even if he were not committed to the dangerous dogman unprincipled despotism, and shameless corruption of the old man grown gray in sin, who now fills the chair of State.

If, by chiessery and corruption, the logs should enwrup the "shoulders of General Lane, it will be no better, as his innecence and ignorance would make him the blind tool of bad men, who, in his name, and under his authority, would perpetrate soits and undertake enterprises with which they would not for the universe have their own names connected, and which would make angels weep.

This brings us to Lincoln. Of his honesty, sincertly, and integrity, there can be no doubt. Those who know him best, and are able to judge, consider him—and I think justify—as equal in ability to many, and superior to some who have filled the Chair of State. Il is somewaken Units of the country.

But he is charged with being a sectional candidate, because many of the States did not choose to send delegates to the Chicago Convention. Such was the case also with the Union resisten. Such was the case also with the Union Convention, and yet its candidates are not charged with sactionalism: Its fact, Bell and Lincoln have less of accitonalism unity phargeable to these than Douglas or Breckturidge. Both were nominated in open Convention, with great harmony and unantistity, while is the Democratic Convention the South withdraw and nominated Breckturidge, while the North remained and nominated Douglas. These, then, attrictly specking, are sectional candidates, while mocratic Convestion the South withdraw and nominated Breckinridge, while the North remained and nominated Douglas. These, then strictly speaking, are accitonal candidates, while Lincola is not. I believe sincerely, that a continuance of the Democratic dynasty, with all its corruptions and disregard of the Constitution and rights of the people, its pandering the foreign influence and Romand Jennitum, would, in four or eight years more, sink our country into a political and religious despotisms, in comparison with which the despotisms of Romais and Turkey would be as far superior in all the elements of peace, safety and confort, as the Gardens of Biese was before the fall of man, to a neld of Cansdian thinsless. Being determined, therefore, to do nothing that would aid, or even tend to inaugurate such a result, I have concluded to safe the finestic movement to the best of my ability, as an American, and a devoted friend to the true and best inferests of my country. As an American, I do not approve of all the measures of the Republican party—or, rather, of some of the members of that party; but those measures, I am assisted, will be checked, controlled, and randered inert, by the Union loving, single minded, and conservative states manabily of Mr. Lincoln. Cannot you and our other true and tried friends in Pennsylvania and New York, agree with me in three views, and go for Liscoln, as the best that can be done in the present crists—hoping that it may be a first and important step in releasing our country from the corrupt was

ting his way through the mountains after h Indian guides had been lost and his provision exhausted.

The Secretary of the Navy was advised by th President to organize this commission from the

ny engagements that will require additional store or any absence from home for many contas to come. I shall give to the Breckin-dge and Lone ticket all my apport. I do not

The Great Rastern, during her stay in this country, has been visited by about one hundred and seventy-first bousand visitors, and under good management would have cleared a large sum for her owners. If she has not made money her visit to America has proved that she is a mechanical success; the pecuniary problem, however, still rumains unsolved.

It is curious and by no means pleasant to observe that, in addition to the superciticanness and neglect of those on board, a system of deception (to use no stronger term) has characterized the entire management of this spleaded by the superciticanness and the suppose the Great Rastern would make her first. American landing at that place, and under that impression the citizens expended a large sum in preparing suitable wharves. But the directors not only broke their fairth with the Portlanders and made their first landing here, but they did not even let the Great Rastern go to Portland at all.

Like master, like man. THOMPSON & MERCH. ATTORNEYS AND COURSEL'ORS AT LAW, pear that he autocaded in erecting his bridge. In the meantime, however, the bridge exhibited at Faddington produced results; the manufacturers agreed to take it hack as a part of their debt, and the materials were used in the mobie structure over the river Warr, at Sunderland, where it was created in 1794. This bridge was leng regarded as the greatest triumph of art. Its span exceeded that of any existing stone arch, being 255 feet, with a rise of 25 feet, the springing commencing 95 feet above the bed of the river, allowing vessels of 300 lone burden to sail undervesth without striking their musts. "If," any Mr. Niephenson, "we are to consider Paine as its author, his daring in engineering certainly does full justice to the ferver of his political career; for, successful as the result has undoubtedly provid, want of experience and consequent ignorance of the risk, could alone have induced as bidd an experience; and consequent ignorance of the risk, could alone have induced as bidd an experience; and consequent ignorance of the risk, could alone have induced as bidd an experience; and consequent ignorance of the risk, could alone have induced as bidd an experiencing in the surface of the which, as regarded its proportions, and the small quantity of material employed in its construction, will probably remain unrivalled."—Looden (Austrieriy.

Sight Restored after Forty Years' Blindeness.

Some forty years ago, Joehus Lackins, employed in the furnace then in blast at Beaver Fells, Pa., lost his eight by the bursting of a moid find of moiden metal. One eye was completely burnt out of its seeks, and the other apparently irretrievably injured, and efforth is usual occupation. Being an excellent victinist, he eked out a scanty subsistence by playing for restine parties, and celling baskets, which he learned to make. But as he grew older these resources failed him, and at length, after wandering a great deal, the old man, homeless, friendless and sightless, was returned to the authorities of Beaver county, and became as immate of the Foor House. We learn these facts from the correspondent of the Heaver Aryus, who concludes the nurrative as follows: OAK ORCHARD Acid Springs !
